Address, C. H. C., care of American Journal of Dental Science, Madison, Wis.

Daniel's Gold Faced Alloy.

Six Reasons Why This Alloy Is Preferred to All Others:

FIRST: It requires but half the usual quantity of mercury to thoroughly amalgamate it.

SECOND: It does not shrink and cavities need but slight undercuts.

THIRD: If worked down under pressure it will make the densest filling.

FOURTH: Bridge work and molar crowns are built up with it.

FIFTH: It can be worked into any of the impression compounds and makes perfect dies.

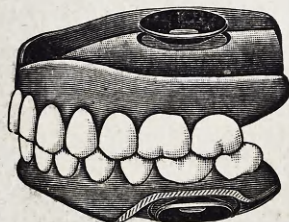

SIXTH: It works well in children's teeth under moisture.

PRICE FOR CUT ALLOY: 1 oz., \$2.00; 5 oz., \$8.75; 10 oz., \$15.00.

One trial oz., \$1.50, sent by mail on receipt of money order.
